#### **DETAILED ACTION**

Page 2

### **Drawings**

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the male anchors being spread mechanically as in claim 26, an anchoring system for mounting an object wherein the male fasteners form at least one acute angle and extend in at least two different planes when connected to the female anchor as in claims 30 and 32 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3733

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "12" and "20" have both been used to designate the second screws on page 4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Page 3

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference number P' is not shown in the figures. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3733

Page 4

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: reference number P1 is not mentioned in the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### Specification

5. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Application/Control Number: 10/535,054 Page 5

Art Unit: 3733

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

6. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes." etc.

7. The abstract of the disclosure is objected to because it is written in claim format.

Correction is required. See MPEP § 608.01(b).

#### Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 19-22 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Sesic (WO 200038586 A).

Page 6

**Art Unit: 3733** 

Regarding claim 19, Sesic discloses an anchoring system comprising a female anchoring member and a plurality of male anchoring member. The male anchors are mechanically connected to the female anchor and form at least one acute angle with the female anchor. Regarding claims 20 and 21, Sesic discloses a system wherein the plurality of male anchors may connect to the female anchor member at different angles (page 3 paragraph 6 and page 4 paragraph 8). Regarding claim 22, Sesic discloses an anchoring system wherein the connection means for the male anchor is an external thread and the connection means for the female anchor is a bore with an internal thread. Regarding claim 29, Sesic discloses an anchoring system comprising a female anchoring extends within a bone and through a break and a plurality of male anchoring members engaging the female anchoring member.

#### Claim Rejections - 35 USC § 103

10. Claims 19, 20, 22, 30, 31, and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sevrain (Canadian Patent CA 2 408 411 A1).

Sevrain discloses the invention as claimed except for the system having a plurality of male anchors connected to the female anchor. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the system of Sevrain having a plurality of male fasteners connected to the female anchor, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. St. Regis Paper Co. v. Bemis Co., 193 USPQ 8.

Art Unit: 3733

11. Claims 23 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sevrain (Canadian Patent CA 2 408 411 A1) in view of Bush (U.S. Patent 361,985).

Sevrain discloses the invention as claimed except for the system having a hook and slot connection means between the male and female anchors. Bush teaches a system having a hook and slot connection between a male and female anchor in order to temporarily or permanently anchor objects with great strength (column 2 lines 53-60). It would have been obvious to one having ordinary skill in the art at the time the invention was made to manufacture the system of Sevrain with a hook and slot connection means between the male and female anchors in view of Bush in order to temporarily or permanently anchor objects with great strength.

12. Claims 24, 25, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sevrain (Canadian Patent CA 2 408 411 A1) in view of Chow (U.S. Publication 2005/0240188 A1).

Sevrain discloses the invention as claimed except for the system having at least one opening in the female anchor member and the male anchor having an expandable element that automatically expands once passed through the female anchoring member. Chow discloses a fastener with an expandable tip made that expands while being threaded through a bore in order to engage the inner surface of a bone (page 5 paragraphs 68-70). It would have been obvious to one having ordinary skill in the art at the time the invention was made to manufacture the male anchor members of Sevrain with expandable tips in view of Chow in order to engage the inner surface of a bone.

Application/Control Number: 10/535,054 Page 8

Art Unit: 3733

## Allowable Subject Matter

13. Claims 26, 28, and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for cited references the examiner felt were relevant to the application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nicholas Woodall whose telephone number is 571-272-5204. The examiner can normally be reached on Monday to Friday 8:00 to 5:30 EST...

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO
